DETAILED ACTION

Claims 1-10 are pending in the instant application.

Election/Restrictions

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g. R^1 , R^2 , R^3 , R^4 , etc... and their widely divergent meanings, a precise listing of inventive groups cannot be made.

The following groups are exemplary:

Group I, claim(s) 1-9 (in part), drawn to compounds of Formula I wherein R_4 is benzthiazole.

Group II, claim(s) 1-9 (in part), drawn to compounds of Formula I wherein R_4 is benzimidazole.

Group III, claim(s) 1-9 (in part), drawn to compounds of Formula I wherein R_4 is benzoxazole.

Group IV, claim(s) 1-9 (in part), drawn to compounds of Formula I wherein R_4 is naphthalene.

Group V, claim(s) 10, drawn to a method of using a compound of Formula I wherein R_4 is benzthiazole.

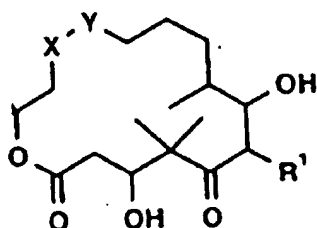

Group VI, claim(s) 10 (in part), drawn to a method of using a compound of Formula I wherein R_4 is benzimidazole.

Group VII, claim(s) 10 (in part), drawn to a method of using a compound of Formula I wherein R_4 is benzoxazole.

Art Unit: 1626

Group VIII, claim(s) 10 (in part), drawn to a method of using a compound of Formula I wherein R₄ is naphthalene.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, **this list is not exhausted**, as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, Applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and Examiner will endeavor to group the same. **If Applicant is unable to elect a single invention, Applicant may instead choose to elect a specific compound and Examiner will attempt to group it.** The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain

, which does not define a contribution over the prior art (see WO/99/02514 A2). The substituents vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered proper. Additionally, the vastness of the

Art Unit: 1626

claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter. The method of preparation claims will be examined with the elected invention commensurate in scope therewith.

A telephone call was made to Ronald R. Santucci on August 21, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
